The Aspin: Site Drawing

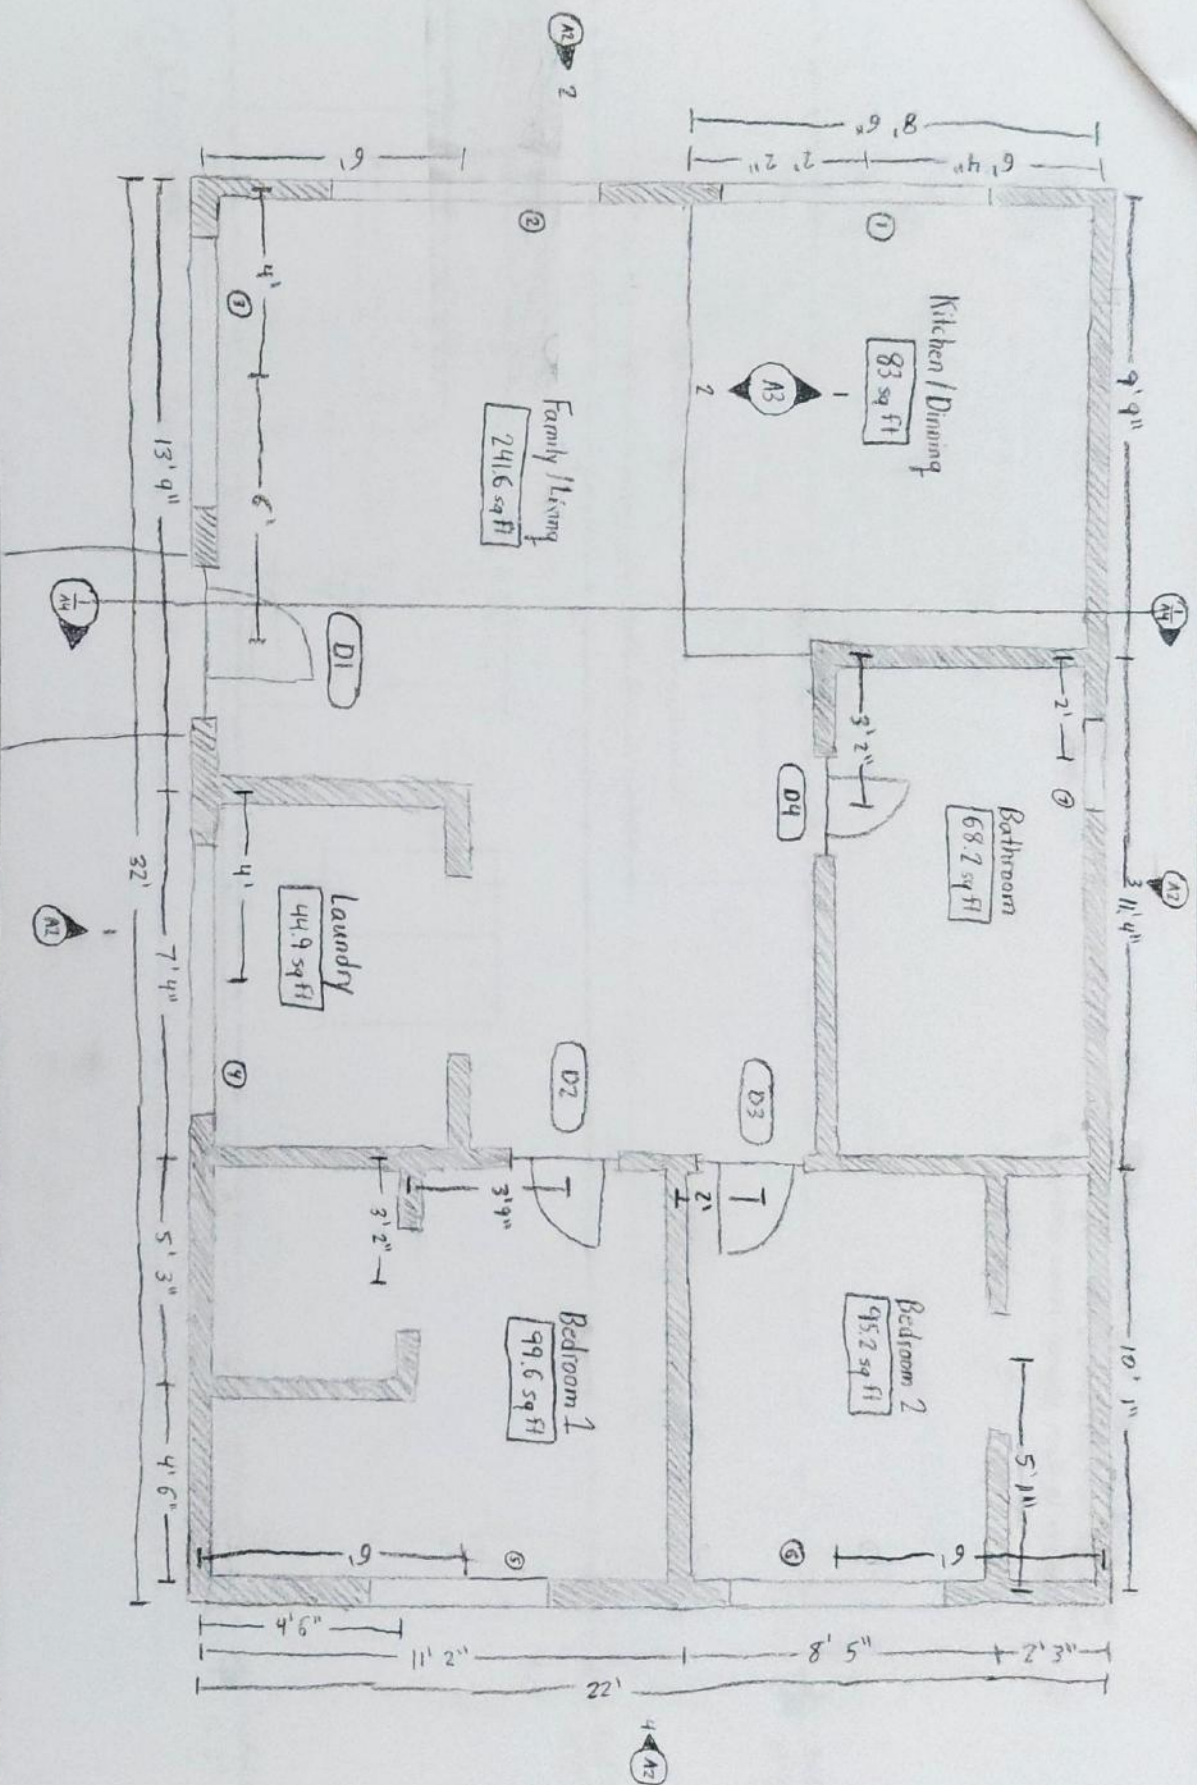

C1 - Site Plan

Description: The tiny home is near a residential community an Fm 359. The area is roughly flat and rural, meaning the plumbing system will be shared with the community close to the home. The property lot is small but there is room for expansion if the home owner pleases.

Note: A Slab-on-Grade Foundation is used due to the arid soil and dryness of the area. Before disturbing the soil, soil testing is recommended to move forward in the construction process.

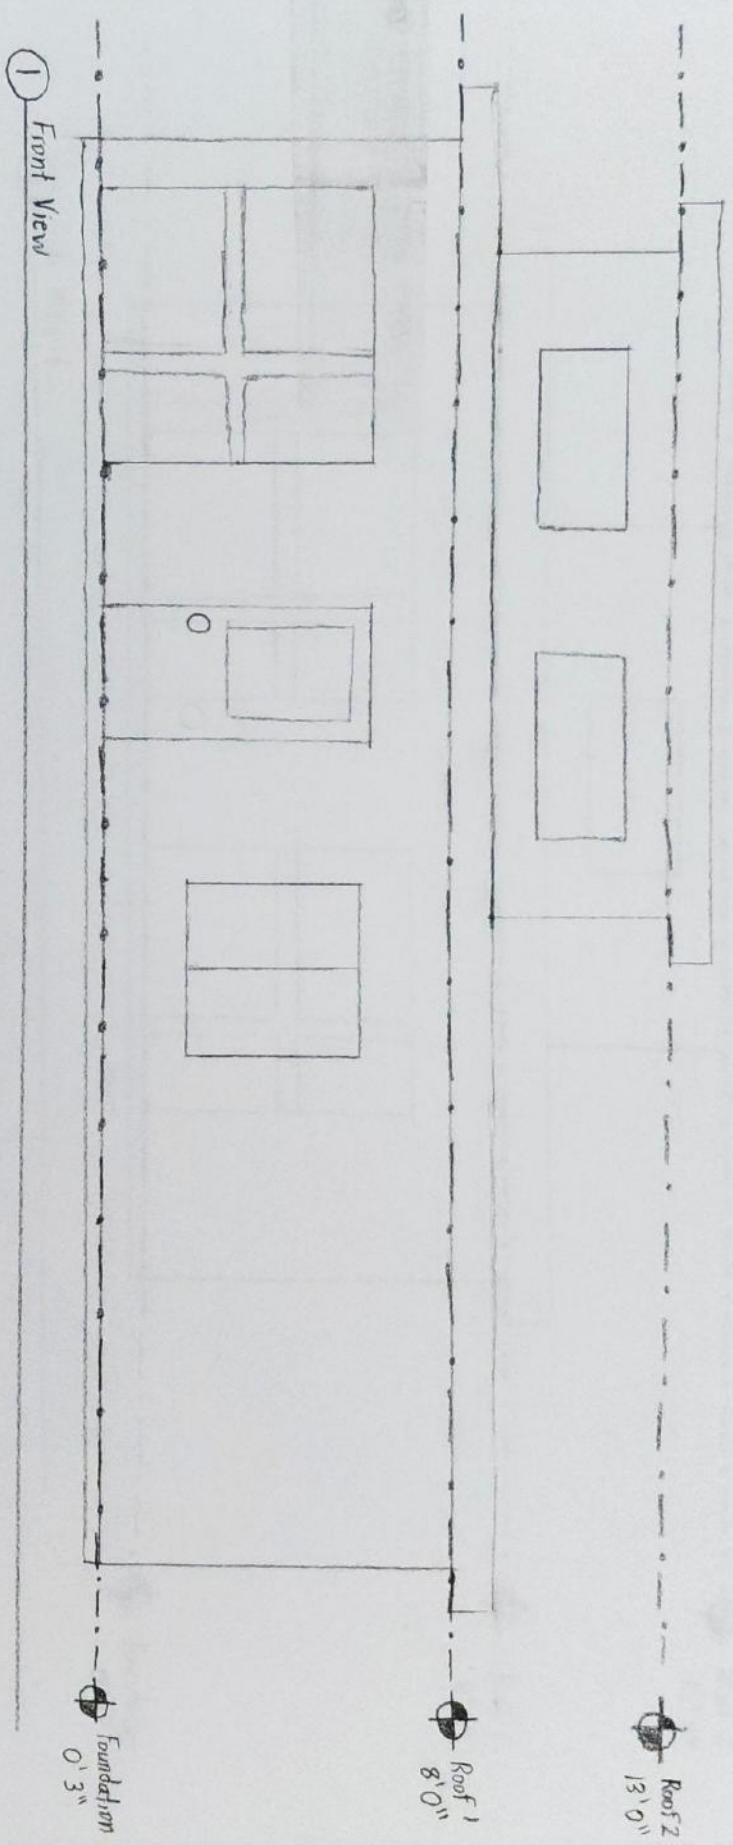

Note: Roads are paved with asphalt and treated with calcium chloride as a road base stabilizer

The Aspin : Floor Plan A1 - Floor Plan

Description: A one-story tiny home with 2 bedrooms and 1 bathroom. The layout is open with less walls to create an open space. With large vanities and spacious closets, the tiny home provides the necessities offered by a normal-sized home.

Note: The Foundation isn't visible due to it being made below the ground. The walls cover the foundation above ground made of concrete.

Description:

The Aspin : Elevation View
A2 - 01 - Elevation

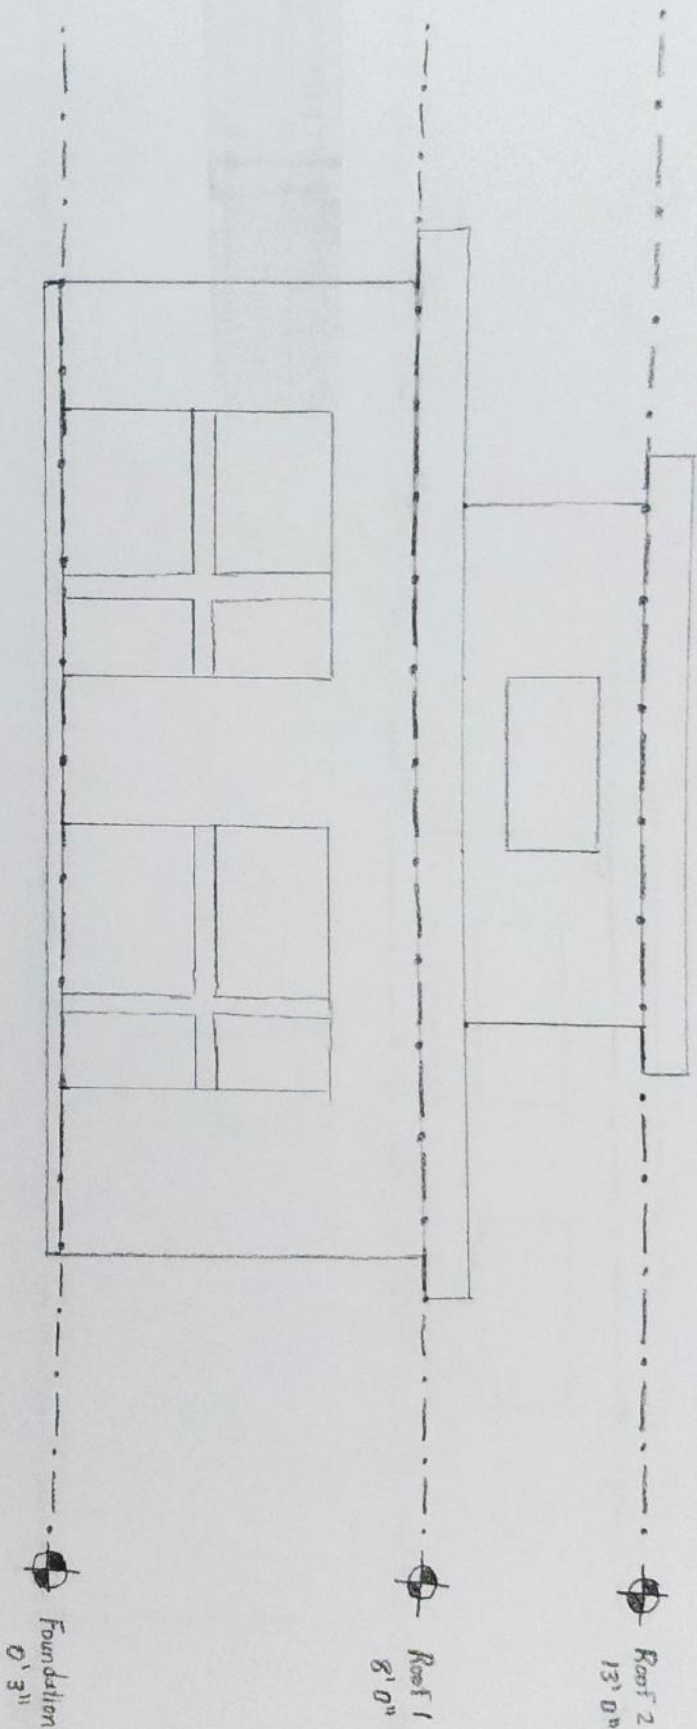

The front view elevation shows the entry door, as well as the front of the home. The sides of the wall are built with brick.

The Aspin : Elevation View
 A2 - 02 - Elevation

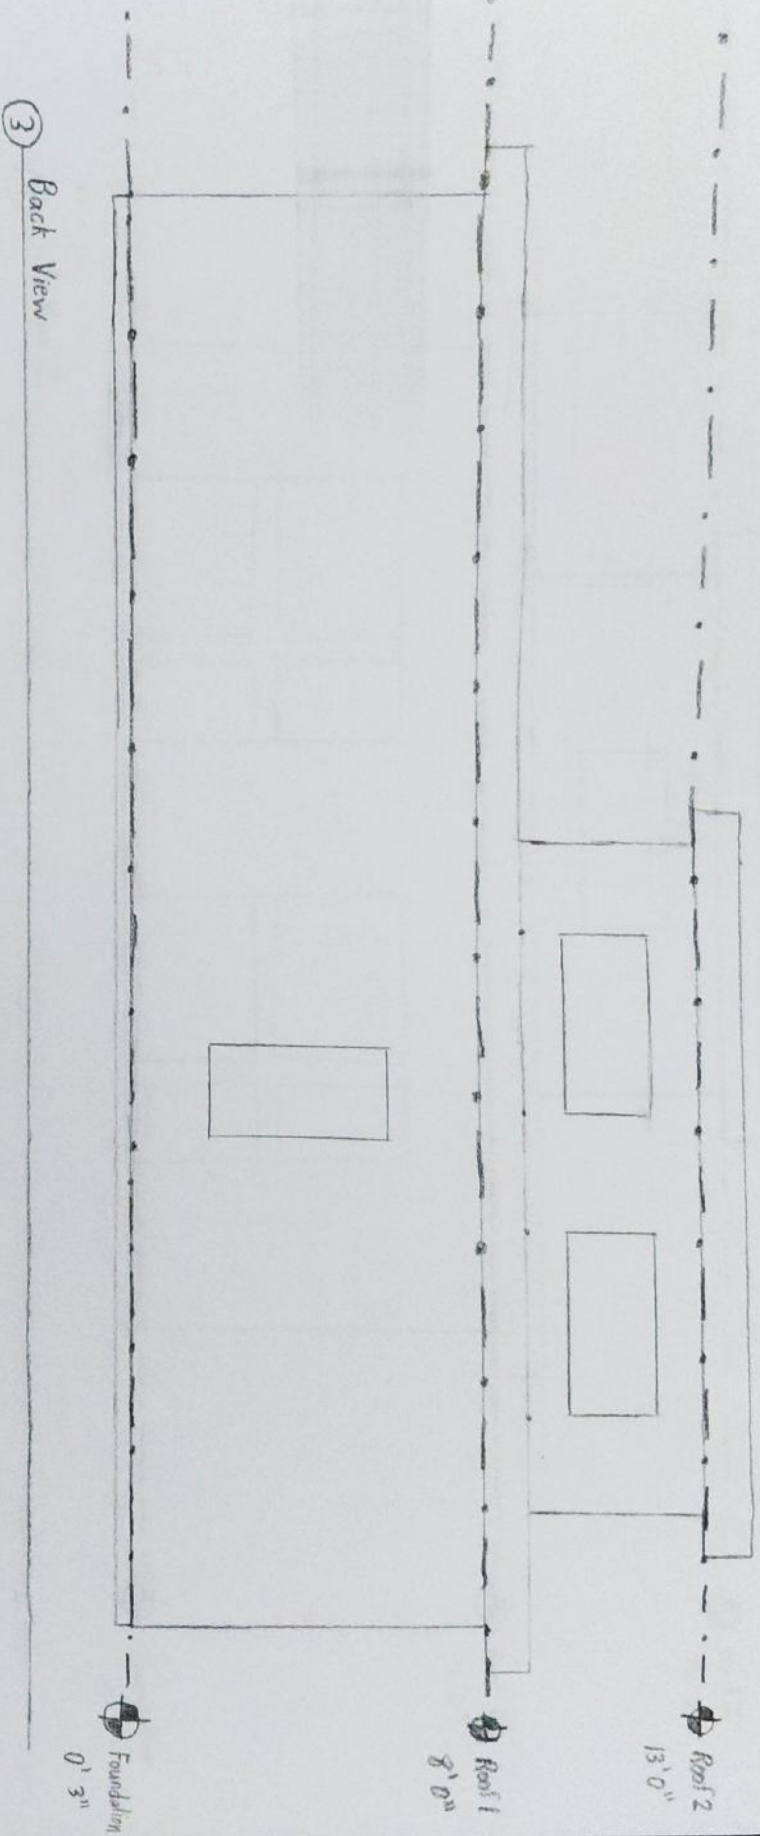

Description:

The side view shows the windows along the kitchen and living room. The large windows made of fiberglass allow ample light to flow into the building.

2 Side View 1

Note: The window at the bottom is the bathroom window and is made of rain glass to protect the privacy of the home owners.

3 Back View

The Aspen : Elevation View

A2 - 03 - Elevation

Description: Almost similar to the front, the back view shows the design of the home. The lack of windows is to protect the privacy of the home owners while allowing them to possibly add new parts to the outside premises.

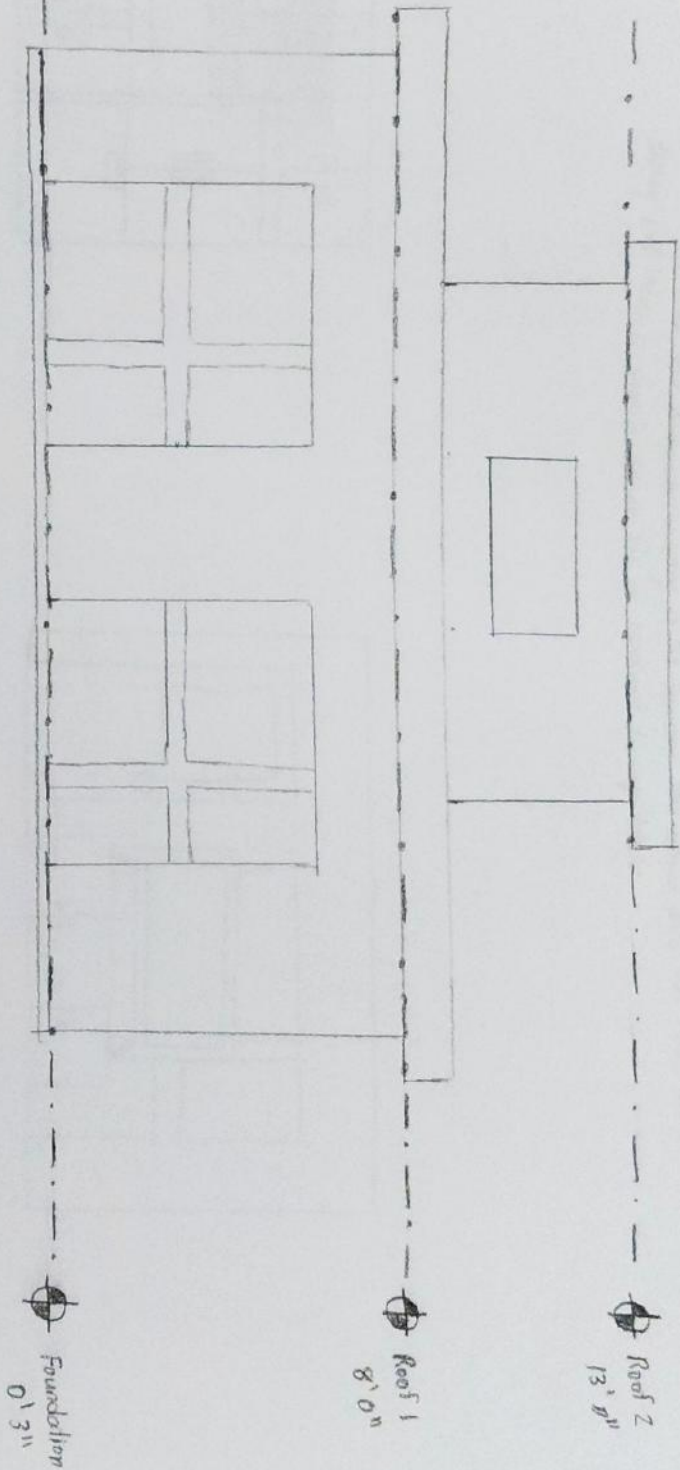

The Aspin : Elevation View

A2 - 04 - Elevation

Description:

The side view shows the bedroom side which looks similar to the other. The symmetry looks similar and adds to the design of the home.

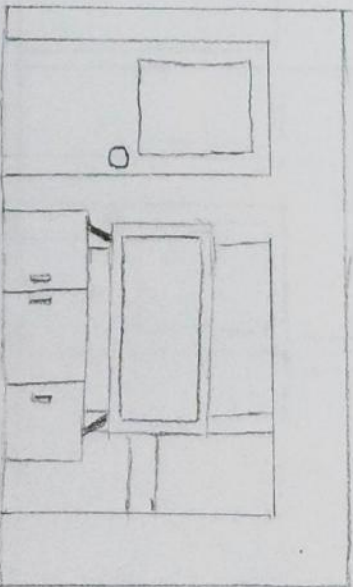

4 Side View 2

Note: The floor of the house is covered with vinyl while the bathroom and laundry floors are covered with porcelain tile. The walls are painted Guild Gray and the cabinets are painted Joy Blue with silver handles. The interior design follows a simple, modern theme with new appliances and open space. The design of the kitchen and bathroom are customizable with the needs of the home owners. The kitchen in the drawing has an island which contains the sink and dishwasher missing in the drawing. The island also has room for dining but there is ample space for a modest dining table.

① Kitchen View

② Living Room View

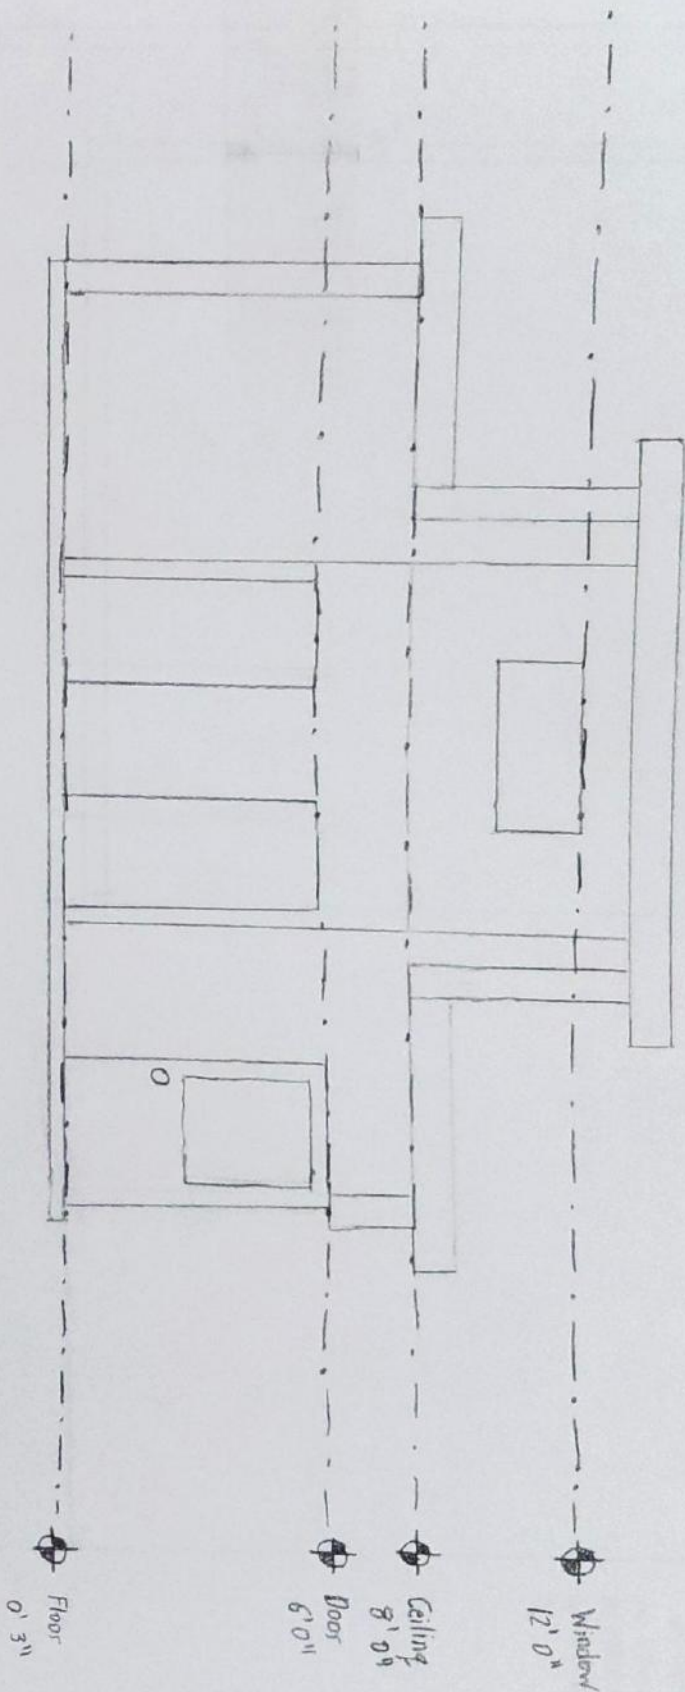

The Aspin : Interior View

A3 - Interior

Description:

The interior views illustrate the design of the tiny home and offer a glimpse of the possible interior design of the house.

Note: The walls in the sectional view aren't aligned. Look at the floor plan for a better representation.

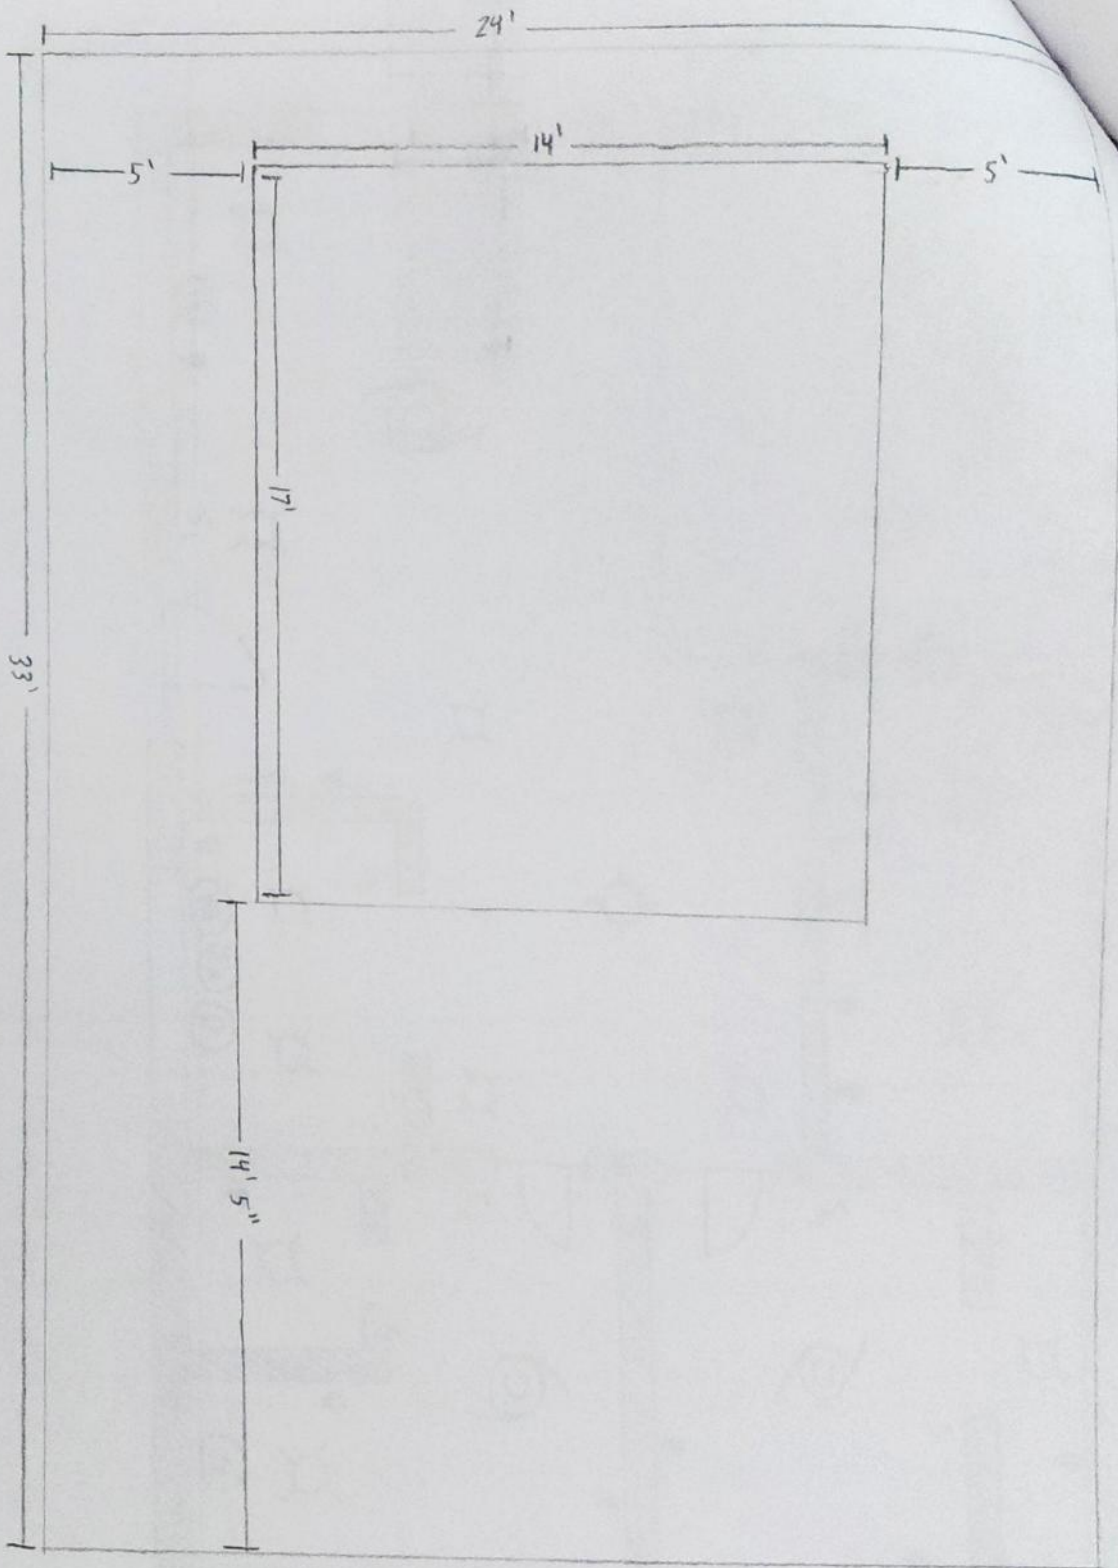

Description:

The sectional drawing demonstrates the interior structure of the tiny home. It also provides a perspective from a certain area of the home.

The Aspin: Sectioned View

Alt - Sectional

Note: Both roofs are sloped 3° to allow water or other substances to flow off.

The Aspin : Roof Plan

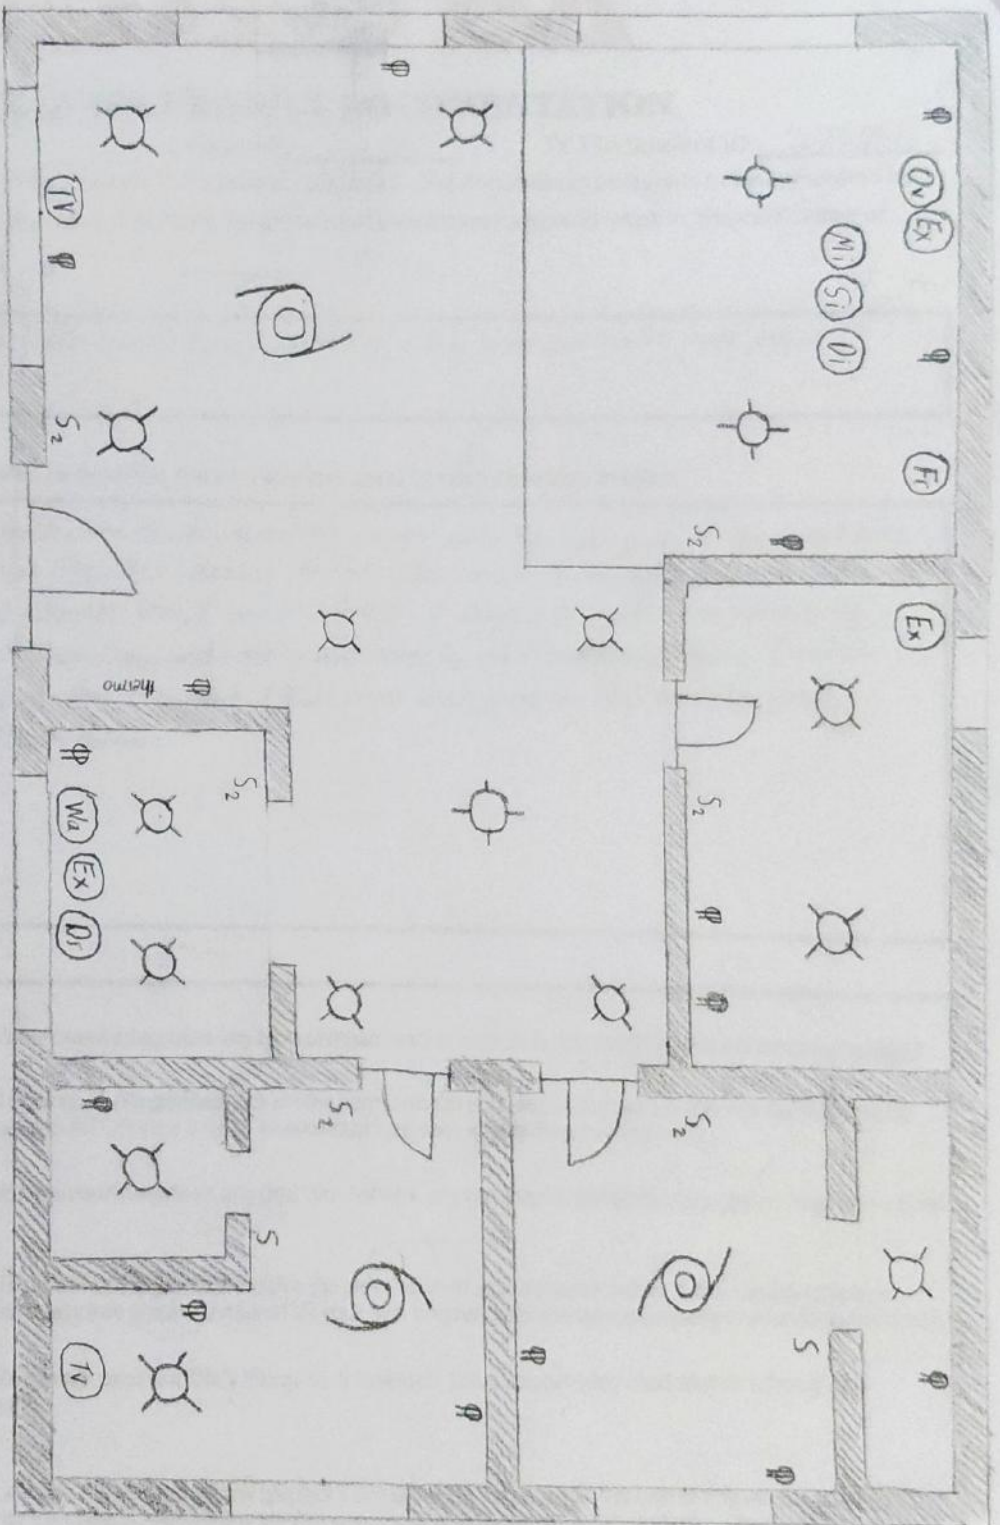

A5 - Roof

Description:

The roof plan offers a simplistic view of the roof layout and dimensions. Made of architectural asphalt shingles, the roof is resistant to erosion and breaks as it ages.

Can

Par

The Aspin : Electrical Drawing

E1 - Electrical

Description :

The tiny house has a smart electrical system with a variation of lights and light-switch setups. The house energy plan is controlled to maintain control and stability of the electric plan.

TEXAS TSA PROJECT DOCUMENTATION

Category #: HP31100

Chapter #: _____

TX TSA Stu

This documentation is required for all Texas TSA rulebook categories. The documentation form is the student and unique to each project. Standard completed documentation forms will result in those projects.

Category Description:

The participant needs to make construction drawings of a tiny home or a trailer using pen or pencil only.

Process Description:

Use 5-10 complete sentences to describe the process you used to complete this project.

The first step to making the construction drawings was to make the floor plan of the tiny home and what it would look like. After finalizing the floor plan design, I researched the design and format of construction drawings. Once I saw the format, I started to create each drawing by hand. Using symbols, abbreviations, and common practices by other engineering firms, I added details to each drawing. Once I finished, I looked over each page for any mistakes and touchups that needed to be solved.

Copyright Certification:

MUSIC

If your solution to this competitive event integrates any type of music and/or sound, is the music and/or sound copyrighted?

Yes ☐ No ☐

If YES, ask for permission and if permission is granted, include the permission in your documentation. If it is royalty free music/sound, cite the royalty free music/sound OR your original music/sound properly in your documentation.

GRAPHICS/VIDEOS

If your solution to this competitive event integrates any graphics/videos, are the graphics/videos copyrighted, registered and/or trademarked?

Yes ☐ No ☐

If YES, ask for permission and if permission is granted, include the permission in your documentation. If it is royalty free graphics/videos are royalty free, cite the royalty free graphics/videos OR your own original graphics/videos properly in your documentation.

THOUGHTS/RESEARCH

If your solution to this competitive event uses another's thoughts or research, have you properly cited another's thoughts or research in your documentation?

Yes ☐ No ☐

I, _____ (chapter advisor initials), have checked my student's solution and confirm that the use of any music, graphics, videos, and research of another's is done so with proper permission and is cited correctly in the student's documentation and/or the solution has been found to have all original thought with no use of other's thoughts/research.
